

Permit No. 85260T

TEMPORARY
THE STATE OF NEVADA

**PERMIT TO CHANGE THE PUBLIC WATERS OF THE
STATE OF NEVADA HERETOFORE APPROPRIATED**

Name of Permittee: ATLANTIC RICHFIELD COMPANY
Source: UNDERGROUND
Basin: MASON VALLEY
Manner of Use: IRRIGATION
Period of Use: EXPIRES DECEMBER 31, 2016
Priority Date: 03/25/1975

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit, to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 68398, is issued subject to the terms and conditions imposed in said Permit 68398 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 85260T, 85261T, and 85625T shall not exceed 159.50 acre-feet annually for the irrigation of 39.875 acres.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire December 31, 2016, at which time all rights herein granted shall revert to the right being changed by this temporary permit.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.229 cubic feet per second or 72.0 acre-feet annually, but not to exceed 4.0 acre-feet per acre.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

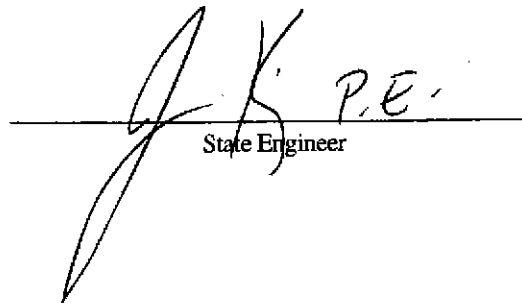

N/A

Map in support of proof of beneficial use shall be filed on or before:

N/A

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 27th day of **April, 2016**

hereby make(s) application for permission to change the

☒ Point of diversion☒ Place of use☒ Manner of use☒ of a portion

of water heretofore appropriated under (Identify existing rights by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and identify right in Decree.)

Permit No. 683981. The source of water is Underground Sources

Name of stream, lake, underground, spring or other sources.

2. The amount of water to be changed Pro-rata share of the diversion rate not to exceed 72.00 acre feet annually

Second feet, acre-feet. One second foot equals 448.83 gallons per minute.

3. The water to be used for Irrigation Purposes

Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use

4. The water heretofore used for Irrigation Purposes

If for stock, state number and kind of animals.

5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated.)

Lot 1 (NE1/4 NE1/4) Section 1 T12N, R25E, MDM or at a point from which the NE corner of said Section 1 bears North 5 degrees 48 minutes 37 seconds East, a distance of 1,300.36 feet. Refer to map to support Proof of Beneficial Use under Permit No. 58481.

6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)

SE1/4 SE1/4 Section 3, T.14N., R25E., MDM, or at a point from which the SW corner of said Section 3 bears South 88 degrees, 48 minutes, 30 seconds West, a distance of 5,241.00 feet. Refer to map filed under Permit No. 68398.

9-108
L4

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

18.00 acres within the NE1/4 and the N1/2 SE1/4 Section 1 T12N, R25E, MDM. Refer to map to support Proof of Beneficial Use under Permit No. 58481.

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

18.00 acres within a portion of the NW1/4 NW1/4 and N1/2 SW1/4 NW1/4 Section 3, T.14N., R.25E., MDM and the SW1/4 NW1/4 and NW1/4 SW1/4 Section 35, T.15N., R.25E., MDM. Refer to map filed under Permit No. 68398.

9. Proposed use will be from January 1st to December 31st of each year.
Month and Day Month and Day

10. Existing use permitted from April 1st to October 31st of each year.
Month and Day Month and Day

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Existing well, pump, motor, totalizing meter, manifold system and piping to sprinkler irrigation system completed under Permit No. 58482 (Certificate 14549)

12. Estimated cost of works None - existing works

13. Estimated time required to construct works None - existing works
If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use one year

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

See attachment

Temporary Applications to Change point of diversion and place of use of a portion
Permit Nos. 68398 and 68400

Applicant: Atlantic Richfield Company, a Delaware corporation

Item Nos. 15 and 16: Detailed description of the project

The National Fish and Wildlife Foundation (NFWF) has purchased the Walker River decreed water rights, Walker River Irrigation District (WRID) storage water rights and the supplemental ground water rights appurtenant to the proposed place of use from The Turf Company. NFWF will be changing the point of diversion, place and manner of use of these acquired water rights to NFWF projects in the Walker River drainage. The Turf Company conveyed only water rights to NFWF and retained ownership of the land, appurtenant wells and irrigation facilities. The Turf Company has continued to irrigate under a two year lease agreement with NFWF; however, this water right lease agreement has expired. The Turf Company will continue to irrigate as a result of water right lease agreements with other parties. The applicant under this temporary application to change has entered into a water right lease agreement with The Turf Company for a total combined duty of 72.00 acre feet per annum of primary ground water under Permit Nos. 68398 and 68400.

As the owner of the Walker River decreed and WRID storage water rights, NFWF will not provide surface water sources to the proposed place of use under this temporary application; therefore, primary ground water is required to continue irrigating within the proposed place of use. The total combined duty of 72.00 acre feet of ground water will be utilized for primary "stand alone" purposes.

The period of use is proposed for a full year, January 1st through December 31st to prevent root desiccation and retain sufficient soil moisture to protect the viability of existing crops.
